The aim of these meetings is to provide a major platform for presenting the latest and most significant results in the area of machine learning, continuing the tradition of the five earlier EWSLS European Working Sessions on Learning. These conferences are held in collaboration with the European Conference on Machine Learning (ECML) and the European Conference on Principles and Practice of Knowledge Discovery in Databases (PKDD). The conferences are dedicated to the presentation of the latest results in the area of machine learning and data mining, and they are considered the premier European conferences in these fields.
